## PROGRAM – the lectures are in held in English, without interpretation.

8.00-9.00	Registration	
9.00-12.40	Opening; Morning Session	Chairman: Ron Ofri DVM PhD. Dipl. ECVO Associate Professor, Hebrew Uni. Jerusalem
9.00-9.30	Diagnosis and treatment of orbital tumors	Zsolt Szentgáli DVM, Senior Lecturer Ophthalmologist; Veterinary University Budapest
9.30-10.20	A week on emergency duty at UC Davis – Ophthalmic emergencies and how we handled them	Prof. D. J. Maggs, BVSc, DACVO University of California, Davis, USA
10.20-11.00	Coffee break	
11.00-11.50	Antiviral therapy for feline herpesvirus	Prof. D. J. Maggs, BVSc, DACVO University of California, Davis, USA
11.50-12.40	Feline quantitative and qualitative tear film disturbances – Do cats get dry eye?	Prof. D. J. Maggs, BVSc, DACVO University of California, Davis, USA
12.40-14.00	Lunch time, Optional Guided Tour on the Veterinary University	
14.00-	Afternoon Session	Chairman: Simon Pot DVM, Dipl.ACVO/ECVO, University of Zürich
14.00-14.50	Cataract surgery – Some philosophy regarding case selection, preoperative preparation, and surgical training	Prof. D. J. Maggs, BVSc, DACVO University of California, Davis, USA
14.50-15.40	Canine quantitative and qualitative tear film disturbances – No longer just cyclosporine	Prof. D. J. Maggs, BVSc, DACVO University of California, Davis, USA
15.40-16.30	Coffee break	
16.30-17.20	Treating equine recurrent uveitis – Before and after cyclosporine implants	Prof. D. J. Maggs, BVSc, DACVO University of California, Davis, USA
17.20-18.00	Using equine air-dried amniotic membrane in the treatment of ulcerative keratitis in the horse	Prof. A. Trbolová DVM, PhD (Vet. Uni. Kosice, Slovakia)

## PERFORMERS:

**PROF. DAVID J. MAGGS** received his veterinary degree from the University of Melbourne, Australia in 1988 and then spent 5 years in mixed animal practices there and throughout Great Britain. He then completed small animal and equine internships at Colorado State University, and a research fellowship and comparative ophthalmology residency at the University of Missouri. He joined the faculty at the University of California, Davis in 2000. He is the author of Slatter's Fundamentals of Veterinary Ophthalmology (now in its 5th edition), an editorial board member for the Journal of Feline Medicine and Surgery, a founding board member of the American Board of Veterinary Ophthalmology, and the 2012 WVC Small Animal Continuing Educator of the year. Prof. Maggs major interests are ocular surface disease.

**PROF. ALEXANDRA TRBOLOVÁ** DVM PhD, graduated at The University of Veterinary Medicine in Kosice in 1987. Since graduation, she has been working at the University in Kosice at the Small Animal Clinic, and since September 2015, she is head of department. She specializes in veterinary ophthalmology since 1993. She visited Florida to receive further education in ophthalmology from Prof. K.N. Gelatt and D. Brooks. She attended specialized training courses in Giessen and Munich and at the University of Veterinary Medicine in Vienna. Between 2012 and 2015 actively participated in intensive veterinary ophthalmology specialist training courses, which took place under the leadership of diplomates of ACVO and ECVO (R. Ofri, T. Zemlic, N. Hakansson, D. Maggs). Prof. Trbolová was invited speaker at conferences organized by the WSAVA in Bulgaria, Poland, the Czech Republic, Serbia and Iran. She introduced the use of dried amniotic membrane in veterinary ophthalmology. Her researches are directed toward hereditary eye diseases and their diagnosis nowadays. In 2015 she founded The East European Society of Veterinary Ophthalmology (EESVO) in Slovakia. She is the president of the EESVO. The main goal of the association (in cooperation with Dipl. ECVO and ACVO) is to support the education of veterinarians in the specialization in veterinary ophthalmology.

**ZSOLT SZENTGÁLI** is a small animal veterinary specialist, chief veterinary ophthalmologist, member of the Department of Surgery and Ophthalmology of the University of Veterinary Sciences Budapest with more than 23 years of experience in clinical ophthalmology. He spent his postgraduate studies at the University of Florida, Veterinary University of Hannover, Vienna and Helsinki. He is the lecturer and examiner on both English and Hungarian faculties of the „Veterinary Ophthalmology” subject which is part of the main curriculum and lecturer of the postgraduate and small animal veterinary specialist training courses. He is a regularly invited speaker of the national veterinary conferences, the annual academic reports and the SHIOL and MSZT-Retina human ophthalmology conferences. He is the author of several Hungarian publications and book sections in topics of ophthalmology and the official reviewer of the English scientific „Acta Veterinaria Hungarica” journal. Tied to his name are the introduction of phacoemulsification cataract surgery and intraocular lens implantation in small animals and using diodelaser procedure to treat glaucoma from the end of the 90's.
